CoCollaber — Product Requirements Document (PRD) v1.0

Stage 02 · Source of truth: CoCollaber — Idea Document v1.0

Labels used: OPEN DECISION = undecided, needs an owner · **PRODUCT ASSUMPTION** = working assumption to validate · Priorities: **P0** (first usable product), **P1** (follows MVP), **P2** (future)

---

1. Document Control

Field	Value
Product	CoCollaber
Document	PRD v1.0
Status	Draft, pending freeze
Upstream input	Idea Document v1.0 (treated as frozen)
Downstream	SRS v1.0
Scope	Product-level WHAT and WHY. No database, API, framework or deployment detail
ID scheme	PRD-FR-### (functional), PRD-NFR-### (non-functional), PRD-US-### (user stories)

2. Executive Summary

CoCollaber is a global, domain-agnostic opportunity and collaboration platform. People state what they are looking for and what they can offer, discover relevant opportunities and people, and begin real participation: joining a team, project, event, competition, community or creative collaboration. Any user can create opportunities for others.

The MVP exists to test one hypothesis: *can CoCollaber help people discover relevant opportunities and people and successfully begin meaningful participation or collaboration?* This PRD defines the smallest product that can answer that question honestly, without narrowing the concept into a job portal, networking site or freelance marketplace.

3. Product Vision

A place where everyone has an opportunity. Anyone, in any field and at any level, can find an opportunity and create one.

4. Product Mission

Make opportunities more discoverable and accessible by bringing people and possibilities together on one open, global platform.

5. Product Goals

ID	Goal
G1	Let any user quickly express what they seek and offer

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

ID	Goal
G2	Make relevant opportunities and people discoverable across domains
G3	Enable any user to create an opportunity in minutes
G4	Turn discovery into actual participation (interest → connection → start)
G5	Keep the platform safe and trustworthy enough that people will engage with strangers
G6	Support new domains without product redesign

6. Product Non-Goals

For v1.0, CoCollaber is **not**:

- A job portal, applicant-tracking system or LinkedIn alternative
- A freelance marketplace with escrow, contracts or invoicing
- A general social network (feed of posts, likes, followers as the core)
- A payments processor
- A platform with AI matching or premium tiers at launch
- A domain-specific product (e.g., a sports-only or tech-only app)

These may overlap with future directions but do not define the product.

7. Problem Statement

Opportunities are scattered across job boards, social media, messaging groups and word of mouth. Access often depends on who you already know. Many valuable forms of participation (a band needing a drummer, a research project needing students, a volunteer drive needing helpers) have no natural home online. People with multiple interests must fragment themselves across platforms, and those who offer opportunities struggle to reach the right people outside their circles.

8. Product Opportunity

- Large unmet need across non-professional and cross-domain participation
- Existing platforms are siloed by category (jobs, gigs, communities, networking)
- A flexible opportunity model plus multi-identity profiles can serve many domains with one product
- Every user is a potential creator, so supply can grow from the community itself

PRODUCT ASSUMPTION: enough demand exists in a focused launch segment to reach critical mass before the platform is broad.

9. Product Positioning

For people in any field who want to find or create opportunities and collaborators, **CoCollaber is an opportunity and collaboration ecosystem** that connects people and possibilities regardless of domain, background or experience. Unlike professional networks, job boards or freelance marketplaces, it treats paid and unpaid, formal and informal participation as equally valid.

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

10. Target Users

Segment	Role on platform
Individuals across domains (students, athletes, artists, musicians, creators, researchers, hobbyists, tradespeople, professionals)	Seek and offer
Founders and project leads	Create opportunities, find collaborators
Small businesses	Create opportunities, find people
Communities, clubs and organizers	Create opportunities, find participants

OPEN DECISION (OD-01) Launch focus. The product serves everyone, but launch must seed a focused segment. **PRODUCT ASSUMPTION:** one geography plus 3 to 5 seeded domains, chosen for existing density and varied opportunity types. The specific choice is for the founder to make.

11. User Personas

Persona	Goal	Pain today	Success on CoCollaber
Ananya, student	Gain research experience	Doesn't know who is recruiting	Finds a researcher seeking students and starts working with them
Rohan, athlete	Join a team or tournament	Info lives in scattered groups	Discovers a local club and enters a tournament
Meera, artist	Show work, find exhibitions	Open calls are hard to find	Finds an open call and connects with organizers
Sam, musician	Form a band	No reliable way to find compatible players	Meets a drummer and vocalist nearby
Lena, creator	Find a video editor	Hiring means cold messages	Finds editors and sees what they offer
Dev, founder	Find a technical co-founder	Network limited to his circle	Meets relevant people open to early ventures
Café owner	Find a photographer, marketer, designer	No simple channel for small gigs	Posts opportunities and gets suitable responses
Neighbourhood group	Recruit volunteers	Relies on word of mouth	Posts an event need and finds participants
Multi-role user	Be a developer, photographer, footballer	Fragmented across platforms	One profile, many interests

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Persona	Goal	Pain today	Success on CoCollaber
	and volunteer		

12. User Problems

ID	Problem
UP1	I don't know where to find opportunities in my area of interest
UP2	I can't reach the right people outside my circle
UP3	I don't know how to present what I can offer, especially without formal credentials
UP4	I'm unsure whether an opportunity is real, safe or worth my time
UP5	Posting an opportunity reaches too few relevant people
UP6	My interests span several domains and platforms treat me as one thing
UP7	Finding something is easier than actually starting it; follow-through breaks down

13. Core Use Cases

ID	Use case
UC1	Discover opportunities by interest, domain, type, location or compensation
UC2	Create an opportunity for others
UC3	Declare what I seek and what I offer
UC4	Discover people with relevant skills or interests
UC5	Express interest in an opportunity and be considered
UC6	Communicate with a creator or collaborator
UC7	Confirm that participation has begun
UC8	Report or block unsafe content or people
UC9	Maintain multiple interests across domains

14. Domain Ecosystem

CoCollaber is domain-agnostic. Domains are descriptive context for opportunities and people, not separate products. Initial coverage is illustrative: technology, academics, research, sports, arts, music, culture, entertainment, business, entrepreneurship, content creation, media, photography, film, design, social impact, communities, hobbies, competitions, events, volunteering, skilled trades, professional services and others.

PRODUCT ASSUMPTION: a curated starting list of domains plus user-suggested additions, so new domains require no product redesign. **OPEN DECISION (OD-02):** final taxonomy approach (curated categories, free-form

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

tags, or a hybrid).

15. Product Concepts

Concept	Definition
Person	A user with multiple interests and identities; can seek, offer and create
Profile	A person's public presence: who they are, what they offer, what they seek
Offer	A skill, service or willingness to contribute that a person declares
Seek	Something a person is looking for (an opportunity, collaborator, skill or team)
Opportunity	A legitimate chance to participate, contribute, learn, compete, create or earn
Interest	A person's expression of wanting to take part in an opportunity
Connection	An established line of communication between two people
Participation	Confirmed start of involvement in an opportunity
Community	A group around a shared interest (P1)

16. Opportunity Model

Product-level definition: one flexible opportunity concept, differentiated by *type* and *attributes*, rather than separate products per domain.

Information every opportunity conveys (product level):

- Title and description
- Domain(s) and opportunity type
- What is being sought (people, skills, participants)
- Compensation: paid, unpaid or other, stated explicitly
- Location or remote/in-person
- Timing or deadline
- Creator identity
- Status

Opportunity types (PRODUCT ASSUMPTION for MVP): collaboration/project, team or membership, event or competition, volunteering, learning or research, paid work or service, other.

Opportunity lifecycle (product level): Draft → Open → In progress/Filled → Closed. Removed by moderation at any point if rules are violated.

OPEN DECISION (OD-03): whether types carry type-specific fields or all share one common set at launch. **PRODUCT ASSUMPTION:** one common set plus optional free-text detail.

17. User Journey

1. **Arrive and sign up**

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

2. **Onboard:** pick interests, declare what I seek and offer
3. **Discover:** see relevant opportunities and people
4. **Evaluate:** read the opportunity and the creator's profile
5. **Express interest:** include a short message
6. **Connect:** creator reviews, accepts or declines; communication opens
7. **Begin:** both sides confirm participation has started
8. **Create (anytime):** post my own opportunity, restarting the loop

18. Core Product Loop

Express → **Discover** → **Connect** → **Collaborate** → **Grow** → **Create**, as defined in the Idea Document. In the MVP, "Grow" is limited to a confirmed participation record on the profile (P1 for richer reputation).

19. Information Architecture

Top-level areas (product level):

- **Home / Discover:** relevant opportunities and people
- **Search:** opportunities and people with filters
- **Opportunities:** browse, view detail, create, manage mine
- **People:** browse and view profiles
- **My Activity:** interests I've sent, responses I've received, ongoing participations
- **Messages**
- **Notifications**
- **Profile and Settings**
- **Safety:** report, block, community guidelines
- **Admin (internal):** moderation and oversight

20. Feature Requirements

20.1 Accounts and Onboarding

ID	Requirement	Priority
PRD-FR-001	A person can create an account and sign in	P0
PRD-FR-002	Account holders must meet the minimum age rule (see OD-06)	P0
PRD-FR-003	Onboarding collects interests, what the user offers, and what they seek, and can be skipped and completed later	P0
PRD-FR-004	A person can delete their account	P0

20.2 Profiles

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

ID	Requirement	Priority
PRD-FR-010	A profile shows name, short bio, location (optional), interests, offers and seeks	P0
PRD-FR-011	A user can hold multiple interests across domains with no single primary category forced	P0
PRD-FR-012	A user can add examples of their work or experience (links or text), including informal experience	P1
PRD-FR-013	A user controls what profile information is visible	P0
PRD-FR-014	Showcase of past participations and endorsements	P1

20.3 Opportunity Creation and Management

ID	Requirement	Priority
PRD-FR-020	Any user can create an opportunity	P0
PRD-FR-021	Creation requires stating compensation (paid, unpaid or other)	P0
PRD-FR-022	A creator can edit, close or remove their opportunity	P0
PRD-FR-023	A creator can see who has expressed interest	P0
PRD-FR-024	A creator can mark an opportunity as filled or in progress	P0
PRD-FR-025	A creator can post on behalf of a named organization or community (label only)	P1
PRD-FR-026	Draft and save-for-later	P1

20.4 Discovery and Search

ID	Requirement	Priority
PRD-FR-030	Users can browse opportunities	P0
PRD-FR-031	Users can search opportunities by keyword	P0
PRD-FR-032	Users can filter by domain, type, compensation, location/remote and recency	P0
PRD-FR-033	Home surfaces opportunities relevant to a user's declared interests	P0
PRD-FR-034	Users can search and browse people by skill, interest and domain	P0
PRD-FR-035	Users can save opportunities	P1
PRD-FR-036	Personalised recommendations based on behaviour	P1

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

ID	Requirement	Priority
PRD-FR-037	AI-based matching	P2

20.5 Interest, Connection and Participation

ID	Requirement	Priority
PRD-FR-040	A user can express interest in an opportunity with a short message	P0
PRD-FR-041	A creator can accept or decline an expression of interest	P0
PRD-FR-042	A user can withdraw an expression of interest	P0
PRD-FR-043	Accepted parties can communicate directly in the platform	P0
PRD-FR-044	Both sides can confirm that participation has begun	P0
PRD-FR-045	A user can invite a specific person to an opportunity	P1
PRD-FR-046	Persistent connections between people	P1
PRD-FR-047	Team/project spaces	P2

20.6 Communication and Notifications

ID	Requirement	Priority
PRD-FR-050	One-to-one messaging between accepted parties	P0
PRD-FR-051	Users are notified of key events: interest received, accepted/declined, new message	P0
PRD-FR-052	Users can control notification preferences	P1
PRD-FR-053	Messaging outside accepted parties (direct message before acceptance)	**OPEN DECISION (OD-07)**

20.7 Trust, Safety and Moderation

ID	Requirement	Priority
PRD-FR-060	Users can report opportunities, profiles and messages	P0
PRD-FR-061	Users can block other users	P0
PRD-FR-062	Published community guidelines and prohibited-content rules	P0
PRD-FR-063	Admins can review reports and remove content or suspend accounts	P0
PRD-FR-064	Basic proactive screening of opportunities for clearly prohibited content	P1

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

ID	Requirement	Priority
PRD-FR-065	Verification badges, ratings or reputation	P1

20.8 Admin

ID	Requirement	Priority
PRD-FR-070	Admins can view and manage users, opportunities and reports	P0
PRD-FR-071	Admins can manage the domain list	P0
PRD-FR-072	Admin view of core health metrics	P1

20.9 Non-Functional (product level)

ID	Requirement	Priority
PRD-NFR-001	Usable on common phones and desktop browsers	P0
PRD-NFR-002	Core flows feel fast and responsive under expected early load	P0
PRD-NFR-003	Personal data is protected and handled per Section 26	P0
PRD-NFR-004	Content design supports multiple languages later without redesign	P1
PRD-NFR-005	Basic accessibility for key flows	P1

OPEN DECISION (OD-08): web-only responsive product at launch versus native mobile apps. **PRODUCT ASSUMPTION:** responsive web first.

21. MVP Scope

In the MVP: account and onboarding; multi-interest profiles with offers and seeks; opportunity creation and management; opportunity and people discovery (browse, search, filter, interest-based home); express interest → accept/decline → messaging → confirm participation; notifications; reporting, blocking, guidelines; admin moderation; analytics instrumentation.

Deliberately not in the MVP: payments, recommendations driven by behaviour, AI matching, premium plans, organization accounts, groups/communities, ratings and reputation, team spaces, native apps, multiple languages.

Rationale: the loop (discover → interest → connect → begin) is the hypothesis. Everything else is a multiplier that can wait for evidence.

22. P0 / P1 / P2 Priorities

Priority	Capabilities
P0	Accounts, onboarding, profiles, opportunity CRUD, discovery and search, people discovery, interest/accept/decline, messaging, participation confirmation, notifications, report/block, guidelines, admin moderation

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Priority	Capabilities
P1	Saved opportunities, invitations, persistent connections, organization/community posting, communities, work showcase and endorsements, notification controls, proactive screening, verification/ratings, behaviour-based recommendations, admin metrics, multi-language, accessibility depth
P2	AI matching, team/project spaces, premium subscriptions, business and enterprise accounts, featured opportunities, transaction-based services, events tooling

23. User Stories and 24. Acceptance Criteria

ID	Story	Acceptance criteria
PRD-US-001	As a new user, I want to sign up and declare my interests, offers and seeks so I see relevant things quickly.	Account created; onboarding can be completed or skipped; after onboarding, home shows opportunities matching my interests; I can edit them later
PRD-US-002	As a user with several interests, I want one profile spanning domains.	I can add interests across multiple domains; no field forces a single category; all appear on my profile
PRD-US-003	As a creator, I want to post an opportunity easily.	Required fields completed → opportunity is visible in discovery; compensation status is mandatory; I can edit, close or remove it
PRD-US-004	As a seeker, I want to find relevant opportunities.	Keyword search returns matches; filters by domain, type, compensation, location/remote narrow results; closed opportunities don't appear as open
PRD-US-005	As a seeker, I want to find people with a skill I need.	People search by skill/interest/domain returns profiles respecting their visibility settings
PRD-US-006	As a seeker, I want to express interest with a message.	Interest is recorded once per opportunity; creator is notified; I can withdraw; I see its status
PRD-US-007	As a creator, I want to review and respond to interest.	I see all interested people with their message and profile; I can accept or decline; the person is notified
PRD-US-008	As an accepted party, I want to talk to the other person.	Messaging is available only between accepted parties (pending OD-07); new messages notify; blocked users cannot message
PRD-US-009	As participants, we want to record that we started.	Each side can confirm start; the opportunity can move to in progress/filled; confirmed participation is counted for metrics
PRD-US-010	As any user, I want to report or block unsafe content or people.	Report available on opportunities, profiles and messages; blocking hides me from them and them from me; reports reach admin queue

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

ID	Story	Acceptance criteria
PRD-US-011	As an admin, I want to act on reports.	I can view report details, remove content, suspend accounts; actions are recorded; affected users are informed
PRD-US-012	As a user, I want to delete my account.	Account and personal data are removed or anonymised per Section 26; my open opportunities close

25. Trust & Safety

Principle: trust and safety are foundational (Idea Document). Open posting is the core risk.

P0 safety expectations:

- Clear guidelines on prohibited opportunities (fraud, exploitation, illegal activity, sexual content, hate, requests for upfront fees, unsafe conditions)
- Mandatory compensation transparency
- Reporting and blocking on all user-generated content
- Human moderation of reports with defined response targets
- No contact details exposed publicly by default; communication stays on-platform initially
- Safety guidance shown in messaging and on opportunity pages

OPEN DECISION (OD-04): pre-publication review of all opportunities versus post-publication moderation. **PRODUCT ASSUMPTION:** post-publication moderation plus flagging of high-risk patterns, revisited if abuse rates are high. **OPEN DECISION (OD-05):** identity verification scope for v1. **OPEN DECISION (OD-06):** minors policy. **PRODUCT ASSUMPTION:** 18+ only at launch, because minors require specific protections not yet scoped.

26. Privacy Expectations

- Collect only information needed for the product to function
- Users control profile visibility
- Messages are private to participants (subject to safety review of reports)
- Clear explanation of what is public, shared and private
- Users can export or delete their data
- Compliance with applicable data-protection law is required; **OPEN DECISION (OD-09):** launch jurisdictions and the regulations that apply

27. Business Model

Long-term direction (PRODUCT ASSUMPTION): freemium. Free core access to discover, create and participate, with premium advanced capabilities later.

Candidate monetization (none committed, no pricing defined): premium subscriptions, business accounts, featured opportunities, advanced discovery, AI matching, transaction-based services, enterprise capabilities.

MVP: no monetization. Learning comes first. **Constraint:** monetization must not block basic participation for anyone.

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

28. Success Metrics

North Star (PRODUCT ASSUMPTION): number of *confirmed participations started* per week.

Metric	Why
Activation: % new users who complete profile and view or create an opportunity in first session	Onboarding works
Opportunities created per week; share of users who create	Supply health
Interest-to-response rate; time to first response	Loop health
Acceptance rate	Match quality
Participation-confirmation rate (accepted → started)	Core hypothesis
Domain spread of opportunities and participations	Domain-agnostic claim
Week-4 retention of seekers and creators	Stickiness
Share of users who both seek and create	Two-sided loop
Report rate, time to resolve, confirmed-abuse rate	Safety

Numeric targets are to be set after a short baseline period. **OPEN DECISION (OD-10):** MVP success thresholds.

29. Product Analytics

Track at product level: sign-up funnel; onboarding completion; searches and filter use (including zero-result searches); opportunity views; opportunity creation; interest sent/withdrawn/accepted/declined; message sent and replied; participation confirmed; reports and moderation outcomes; domain of each event. Analytics must respect Section 26.

30. Risks

Risk	Mitigation direction
Cold start	Seed a focused segment (OD-01); founders and partners post initial opportunities
Lack of focus ("everyone")	Narrow launch, broad concept
Scams and exploitation	Section 25; fast moderation; guidelines
Low-quality matching across domains	Strong filters and interest-based relevance first; learn before automating
Few creators, many seekers	Make posting fast; invite creators first
Interest without follow-through	Participation confirmation and nudges

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Risk	Mitigation direction
Moderation cost	Reporting tools, patterns, scoped launch
Legal variance	OD-09
Competitive response	Speed, breadth, community

31. Dependencies

- Founder decisions on open items OD-01 to OD-10
- A seeded launch community and initial opportunities
- Moderation capacity (people and process)
- Legal review of terms, privacy and prohibited content
- Notification channels (email at minimum)
- Analytics tooling

32. Assumptions

PRODUCT ASSUMPTION list: A1 enough users in a focused segment will both seek and create; A2 a single opportunity model with type and attributes serves many domains; A3 on-platform messaging after acceptance is sufficient for MVP; A4 users will accept a structured profile; A5 responsive web is sufficient at launch; A6 18+ only at launch; A7 post-publication moderation is adequate initially; A8 no payments needed to prove the hypothesis.

33. Open Product Decisions

ID	Decision	Needed by
OD-01	Launch geography and seeded domains	Before SRS
OD-02	Domain taxonomy approach	Before SRS
OD-03	Type-specific versus common opportunity fields	Before SRS
OD-04	Pre-publication versus post-publication moderation	Before SRS
OD-05	Identity verification scope	Before SRS
OD-06	Minimum age / minors policy	Before SRS
OD-07	Messaging before acceptance	Before SRS
OD-08	Web-only versus native apps	Before system design
OD-09	Launch jurisdictions and applicable regulations	Before launch
OD-10	MVP success thresholds	Before launch
OD-11	Whether organizations/communities become first-class entities, and when	P1 planning

34. Future Roadmap

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Horizon	Themes
Next (P1)	Saved items, invitations, connections, organization/community posting, communities, showcase and endorsements, verification and reputation, recommendations, notification controls, admin metrics, localisation
Later (P2)	AI matching, team/project spaces, premium and business accounts, featured opportunities, events tooling, transaction services, enterprise
Exploratory	Mentorship pathways, institutional hubs, optional on-platform agreements and payments, regional expansion

35. MVP Definition of Done

The MVP is done when:

1. All P0 requirements are delivered and meet their acceptance criteria
2. A new user can sign up, declare interests, find an opportunity, express interest, be accepted, message, and confirm participation without outside help
3. A new user can create an opportunity and manage responses end to end
4. Reporting, blocking and admin moderation work end to end
5. Guidelines, terms and privacy information are published
6. OD-01 to OD-07 are decided and recorded
7. Analytics capture the metrics in Section 28
8. A seeded launch cohort has real opportunities live across the chosen domains
9. No known open issue that compromises user safety or data privacy

36. PRD → SRS Handoff

Carry into the SRS:

- Every PRD-FR and PRD-NFR requirement with its priority; the SRS converts each into testable, detailed requirements
- All P0 user stories and acceptance criteria as the basis for system behaviour and test cases
- The product concepts in Section 15 and the opportunity model in Section 16 as the vocabulary for system entities and states
- The opportunity lifecycle and interest/participation flow as the state models to specify
- Trust and safety (Section 25) and privacy (Section 26) expectations as requirement sources
- Success metrics and analytics events (Sections 28 and 29) as instrumentation requirements

Must be decided before or during the SRS: OD-01 to OD-07 (OD-08 before system design).

The SRS should add (not in this PRD): exact field definitions and validation rules, roles and permissions, state transition rules, error and edge-case behaviour, performance and availability targets, detailed notification triggers, data retention rules, moderation workflows, and measurable acceptance tests.

Out of scope for the SRS unless promoted from P1/P2: everything in the P1 and P2 columns.
